Dedicated to the safety and training of the Fire Service since 1934.

The International Fire Service Training Association (IFSTA) was established in 1934. The mission of IFSTA is to identify areas of need for training materials and to foster the development and **validation** of training materials for the fire service and related areas. IFSTA is an association of fire service personnel who are dedicated to upgrading fire fighting techniques and safety through training.

The IFSTA Validation Conference is held each July. Committees of technical experts meet and work at the conference to address the current standards of the National Fire Protection Association and other standards-making groups as they apply to IFSTA-validated manuals. These technical experts review all manual drafts and verify that the content is valid. All committee members are volunteers who participate based on a desire to serve the fire service and its future through training.

Fire Protection Publications (FPP), an outreach department of the College of Engineering, Architecture and Technology at Oklahoma State University, is the headquarters for IFSTA. FPP's primary function is to publish and disseminate training manuals as proposed and validated by IFSTA. In addition to the IFSTA-validated manuals, FPP researches, acquires, produces, and markets high-quality learning and teaching manuals that compliment the IFSTA-validated manuals.

40 *years of* ESSENTIALS

Making Good Firefighters **GREAT**

TRAIN • LEARN • PERFORM • SUCCEED

For 87 years, we have been dedicated to delivering the most comprehensive safety and training standards and information to every corner of the fire service industry.

IFSTA and FPP manuals provide learning opportunities for all emergency service personnel, from students to instructors to active-duty firefighters.

IFSTA content is written for firefighters by firefighters. While we've transitioned from the early Redbooks to 1,300-page manuals, one thing has never changed: our commitment to quality.

Since its 1977 introduction, the Essentials of Firefighting series has sold more than 1 million copies. Publishing fire service training manuals is IFSTA's primary and only mission.

We are proud to be invested in all levels of today's fire service community. From supporting local fire prevention activities to global support for legislative and fire research projects, IFSTA, in cooperation with Oklahoma State University, provides partnerships for grants and supports various fire service organizations to help the fire service **Train, Learn, Perform, and Succeed.**

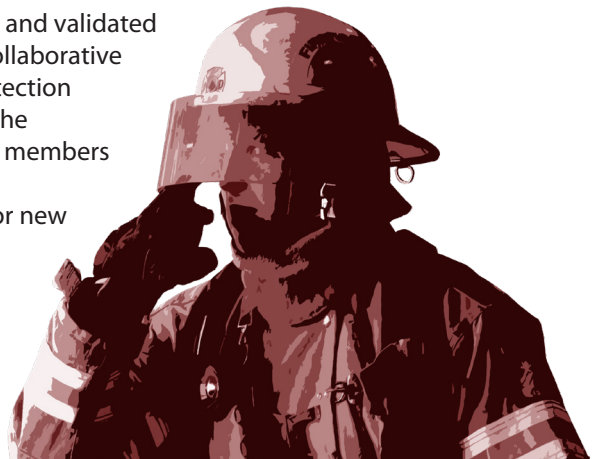

WRITTEN FOR FIREFIGHTERS, BY FIREFIGHTERS!

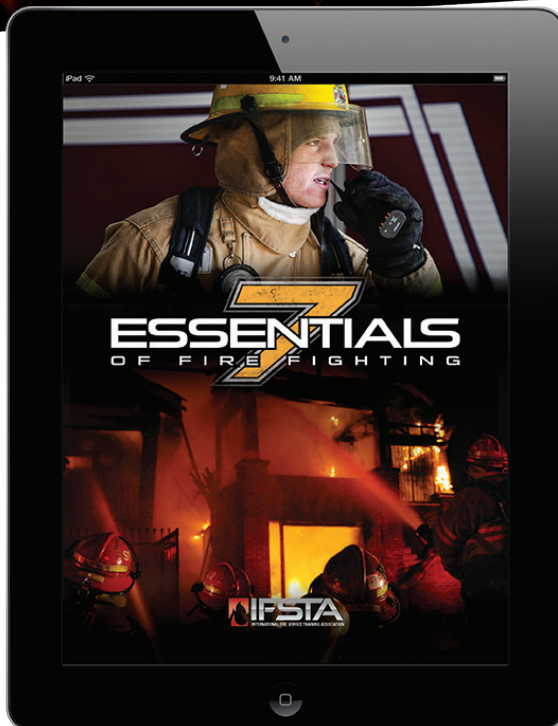

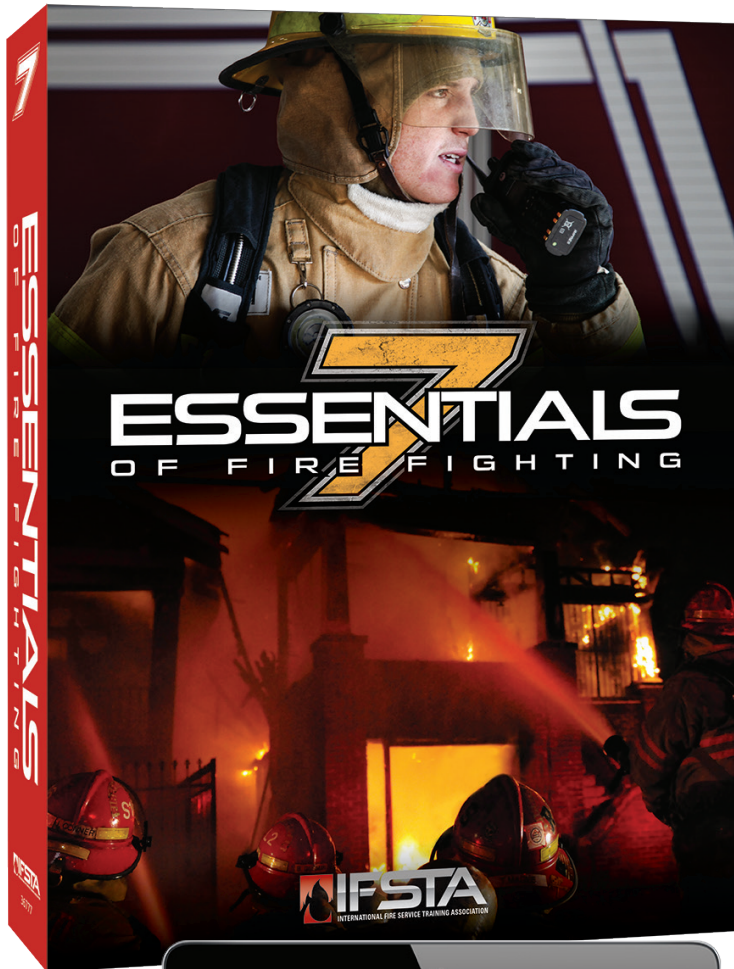

This is not simply a slogan – It's the way IFSTA manuals have been written and validated since 1934. The process to produce new and revised IFSTA manuals is a collaborative effort between the staff members at Oklahoma State University's Fire Protection Publications (FPP) and IFSTA subject matter experts who are assigned to the validation committee for a particular manual. IFSTA validation committee members are a diverse group of subject matter experts from all areas of the fire and emergency services community who volunteer to review draft chapters for new and revised IFSTA manuals.

Committee members also provide assistance in obtaining research materials, photographs, and other information needed to produce a finished manual. Members are sent draft chapters of the manual they are assigned to and submit comments on the drafts to the FPP staff members assigned the project. All comments are reviewed by the entire committee and discussed in committee meetings. Committees complete their work in an 18- to 36-month time frame including regular electronic meetings and two to four in-person meetings held in Oklahoma.

YOUR OPPORTUNITY TO SERVE

If you are interested in serving on or learning more about an IFSTA validation committee, check our website at www.ifsta.org for announcements on new committees seeking members.

ESSENTIALS OF FIRE FIGHTING, 7TH EDITION

This ALL NEW edition meets all of the NFPA 1001, 2019 JPRs. **Essentials 7** is the complete source for firefighter recruit and refresher training.

Key features:

- Organized to meet the needs of students and instructors:
 - Chapters 1-15 Fire Fighter I
 - Chapters 16-22 Fire Fighter II
 - Chapter 23 Emergency First Aid (FFI JPRs)
 - Chapters 24-26 Hazardous Materials Awareness and Operations (FFI JPRs)
 - Chapter 27 NIMS-ICS (FF I, FF II, and Hazmat JPRs)
- IFSTA worked with the UL Firefighter Safety Research Institute (UL-FSRI) to incorporate the latest research on fire behavior and fire attack. This research is throughout the text. **Essentials 7** uses text, photos, illustrations, key terms, and plain language for greater comprehension of this new content.
- Hazardous Materials content is enhanced and meets Awareness and Operations of NFPA 1072, 2017 JPRs.
- The NEW IFSTA one column format means more photos, more illustrations, and more tables. More visuals enhance the student learning experience.
- The **Essentials 7th Edition App** – a student companion app is FREE to download. Stream all 173 skills videos FREE. Practice tool identification FREE. Sample the **Essentials 7 Interactive Course and Exam Prep**.
- A complete line of support products for students and instructors include the Curriculum, Workbook, Exam Prep, Interactive Course, Skills Videos, and eBook.

The new Fire Dynamics research from UL-FSRI is the basis for extensive changes in the Fire Dynamics and Ventilation chapters. These chapters tackle the complexities of fire behavior that new knowledge provides. The information is applied to structure fires and to the effects of fire on buildings. Applying this new science to fire attack means understanding fuel, the stages of fire, the critical need to control the sources of oxygen, and the value of cooling a fire before making entry into a structure.

Go to IFSTA.org to see a sample chapter and for more information.

ESSENTIALS 7: EXAM PREP

1,541 Multiple Choice Questions

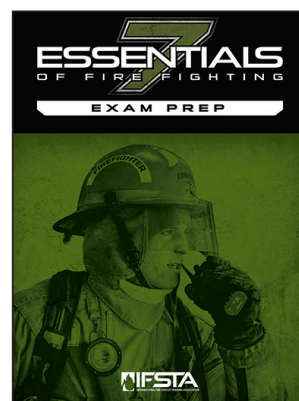

Exam Prep is a self-study tool for students to prepare for end of course tests and the written portion of a certification exam. This popular student product includes 1,541 questions divided among all 27 chapters of **Essentials 7**. Each question is page referenced so the user can quickly find the topic in **Essentials 7**. All items are multiple choice so the student practices the way they will be tested, instilling confidence and reducing test anxiety. The answers for each question are in the back of the Exam Prep Print.

Exam Prep is available in 3 formats:

- **Exam Prep Print**
- **Essentials 7th Edition App** – Easy interface to choose how many questions and from which chapters to customize study time. Questions with wrong answers are stored in a study deck so students can return and focus study on the content that needs the most study. Each question is page referenced to find the topic in **Essentials 7**. This is an in-app purchase.
- As a premium item through an **Essentials 7** course on ResourceOne provided by an instructor.

Exam Prep Print

Item 36778.....\$35.00

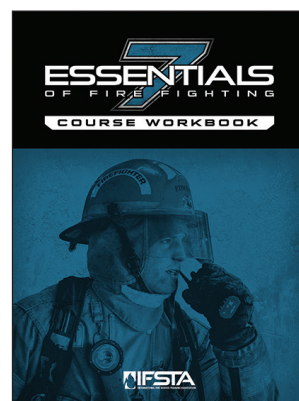

ESSENTIALS 7: COURSE WORKBOOK

The **Workbook** is for the student to review the material in each chapter to support classroom and online instruction. It is ideal for homework assignments. The **Workbook** includes more than 3,000 questions and activities covering all 27 chapters of **Essentials 7**. Instructors can include the activities and questions in lesson plans and for review after the initial presentation of chapter content. Each item is page referenced so the user can quickly find the topic to review in **Essentials 7**. Students will also find value in using the **Workbook** if the instructor does not incorporate it as a part of a course. Different types of questions and activities reinforce various learning styles. Activities include:

- Key Terms
- True/False
- Matching
- Fill in the Blank
- Picture Identification
- Short Answer
- Multiple Choice
- Scenarios

The course does not provide a certificate, documentation of completion, or any form of certification.

HAZARDOUS MATERIALS FOR FIRST RESPONDERS, 5TH EDITION

Publisher: Fire Protection Publications
 Edition/Publication Date: 5th Edition (2017)
 Pages: 791
 ISBN: 978-0-87939-613-8

Item 36331.....\$92.00

eBook Item 75004....\$78.20

Prepare to respond to hazardous materials and weapons of mass destruction (WMD) incidents. This edition provides first responders with information to take appropriate initial actions at WMD incidents and hazardous materials spills or releases. The focus is detailed information about hazardous materials initial operations.

NFPA 1072, *Standard for Hazardous Materials/Weapons of Mass Destruction Emergency Response Personnel Professional Qualifications*, 2017 Edition

- Awareness Level
- Operations Level

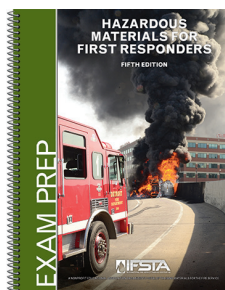

Mission-Specific Competencies from NFPA 1072:

- Evidence Preservation and Public Safety Sampling
- Personal Protective Equipment
- Decontamination
- Detection, Monitoring, and Sampling
- Victim Rescue and Recovery
- Product Control
- Illicit Laboratories

Key Features of the Text

- Learning objectives at the beginning of each chapter
- Case Studies to focus student learning
- Key Terms and Definition are highlighted
- Warning and Caution Boxes stress safety
- Review questions at the end of each chapter
- 40 skill sheets are provided at the end of chapters to provide step-by-step instructions to perform crucial skills
- Correlation to JPRs from NFPA 1072 and NFPA 472 in Appendix A

HAZARDOUS MATERIALS TECHNICIAN, 2ND EDITION

Meets the requirements of the NFPA 1072, *Standard for Hazardous Materials/Weapons of Mass Destruction Emergency Response Personnel Professional Qualifications*, 2017, Chapter 7, Technician. This is the only training manual with content to meet the new NFPA 1072 Professional Qualification Standard and to prepare haz mat responders for certification exams.

This new text also meets Technician Level requirements in OSHA Title 29 CFR 1910.120 (HAZWOPER). NFPA® 472, *Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents* is also referenced where appropriate.

Case histories open each chapter to illustrate important lessons learned in the real world. Photos, tables, and graphics help students master important concepts. Key terms and definitions are highlighted, and Cautions and Warnings emphasize critical safety information.

All knowledge and skills technicians must know, from incident analysis to termination are covered in depth. This includes haz mat chemistry, container identification, construction features and leak points, as well as product control and decontamination operations. Each chapter begins with a list of specific learning objectives and the correlating job performance requirements (JPRs) in NFPA 1072. The JPRs are indexed in Appendix A for students and instructors to locate the exact pages for the applicable content.

This manual is designed to prepare emergency responders to conduct advanced, technical, offensive operations at hazardous materials incidents.

Introducing IFSTA eLibrary

The IFSTA eLibrary is a subscription based program designed to eliminate the hassle of purchasing manuals and managing station libraries. With a single yearly purchase, the IFSTA eLibrary provides unlimited access to all IFSTA manuals for every member of your department. New editions are automatically added to your IFSTA eLibrary subscription at no additional cost. Old editions remain available providing your department with the flexibility to decide when to switch to the new edition.

Interaction

- Easily search for terms in individual manuals or throughout all manuals
- Reports allow you to see time spent in each Chapter and Topic
- Create discussions with members of your department
- Save and share with personal notes

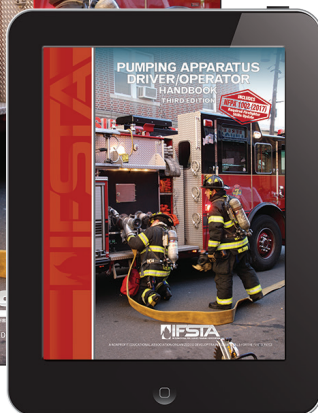

Customization

- Markup images and add text explaining your markings
- Customize manuals with department specific documents, images, and videos
- Hide new editions until you are ready
- Create groups to make communication quick and easy
- Add instructor notes to each student's manual

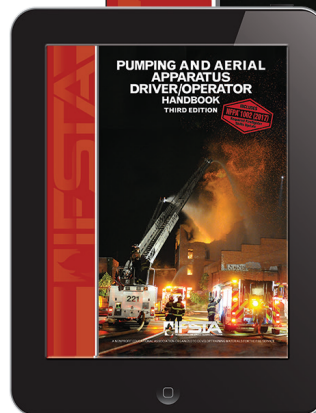

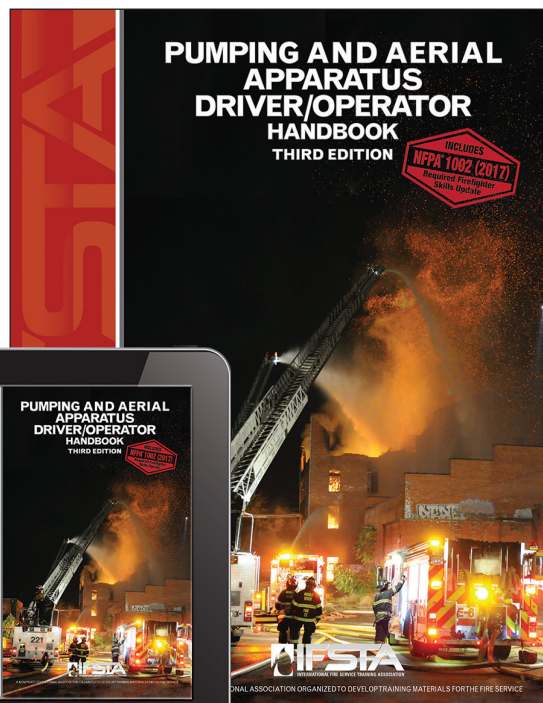

Convenience

- A user friendly layout for computers and mobile devices
- Instantly give personnel access to all manuals
- Library can not be lost or damaged
- Ensure your department is in compliance with ISO requirements
- New manual editions added automatically — never outdated!

IFSTA STREAMLINES DRIVER/OPERATOR TRAINING

The new editions of these best selling IFSTA fire apparatus driver/operator training materials mark a new approach to training driver/operators. Previously, IFSTA published two separate manuals with student and instructor support materials: **Pumping Apparatus Driver/Operator Handbook** and **Aerial Apparatus Driver/Operator Handbook**. Fire departments with both types of apparatus needed two manuals and two curricula. Driver/operator trainees needed two Exam Preps to study for tests.

The release of the 3rd edition of these manuals streamlines the IFSTA training resources. The **Pumping Apparatus Driver/Operator Handbook, 3rd Edition** covers pumping apparatus only. The second book in the pair, **Pumping and Aerial Apparatus Driver/Operator Handbook, 3rd Edition** contains the same 15 chapters as the pumping apparatus textbook, plus an additional 5 chapters relevant to aerial apparatus. Personnel on departments that operate both types of apparatus now only need one manual and one curriculum for training. Students only need one Exam Prep to prepare for testing. If a fire department does not use aerial apparatus, they use the **Pumping Apparatus Driver/Operator Handbook, 3rd Edition** and omit the aerial sections of the curriculum and Exam Prep which include all 20 chapters.

Chapters 2 and 3 are especially beneficial for all driver/operators: *Inspection and Maintenance, and Safety and Operating Emergency Vehicles.*

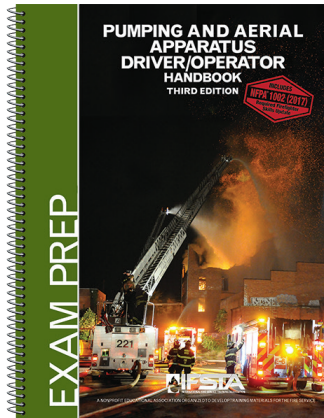

PUMPING APPARATUS DRIVER/OPERATOR HANDBOOK, 3RD EDITION

- Skill Sheets now included
- Key Terms added
- The new Fire Apparatus Manufacturer's Association (FAMA) standardized safety signs for fire apparatus are highlighted
- Hydraulic calculations presented in a logical sequence making teaching and learning easier
- Customary and metric calculations in one chapter
- NEW case histories introduce each chapter
- NFPA 1002 JPR Correlation Matrix

PUMPING AND AERIAL APPARATUS DRIVER/OPERATOR HANDBOOK, 3RD EDITION

- Skill Sheets now included
- Key Terms added
- Aerial apparatus safety emphasizes the most common risks based on actual incidents including: stabilizing equipment before raising the aerial device, wearing fall protection, and avoiding power lines
- Strategy and tactics include assessing rescue priorities specifically for aerial placement and deployment
- Chapters address proper stabilization, positioning and operation of telescoping, and articulating aerial devices

FIRE AND EMERGENCY SERVICES INSTRUCTOR, 9TH EDITION

State-of-the-Art Instructor Textbook and Curriculum

A safe and effective fire service must have capable instructors delivering effective training. The **Fire and Emergency Services Instructor, 9th Edition**, is THE IFSTA source for instructor training.

This NEW text includes all NFPA 1041, *Standard for Fire Service Instructor Professional Qualifications*, (2019) Levels I, II, and III JPRs.

- Level I Chapters 1-10
- Level II Chapters 11-15
- Level III Chapters 16-18
- Appendix A - Correlation to NFPA 1041 JPRs

NFPA 1041, *Standard for Fire Officer Professional Qualifications* requires Instructor Level I certification as a prerequisite for Instructor Level II. This NEW IFSTA Instructor text is ideal for these Level I learners.

NEW! Forty-three skill sheets across Instructor Levels I, II and III assist the instructor and the student to prepare for skills evaluations. The **Instructor 9 Curriculum** includes a **NEW** feature: an Instructor Tool Kit.

Review Boxes are added in this NEW edition to review previous content and highlight prerequisite knowledge for the advancing instructor candidate. For example, Instructor II contains Review Boxes for Level I Instructor content, while Instructor III contains Review Boxes for both Levels I and II.

LIVE FIRE INSTRUCTOR, 1ST EDITION

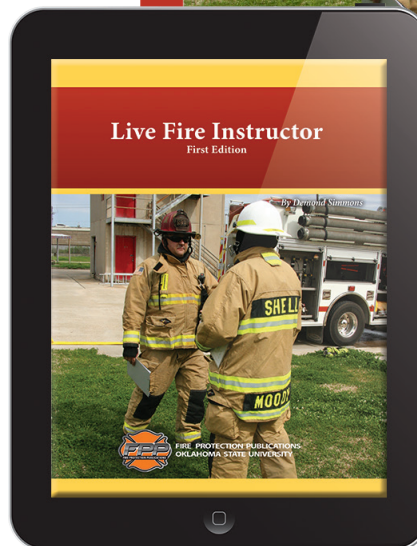

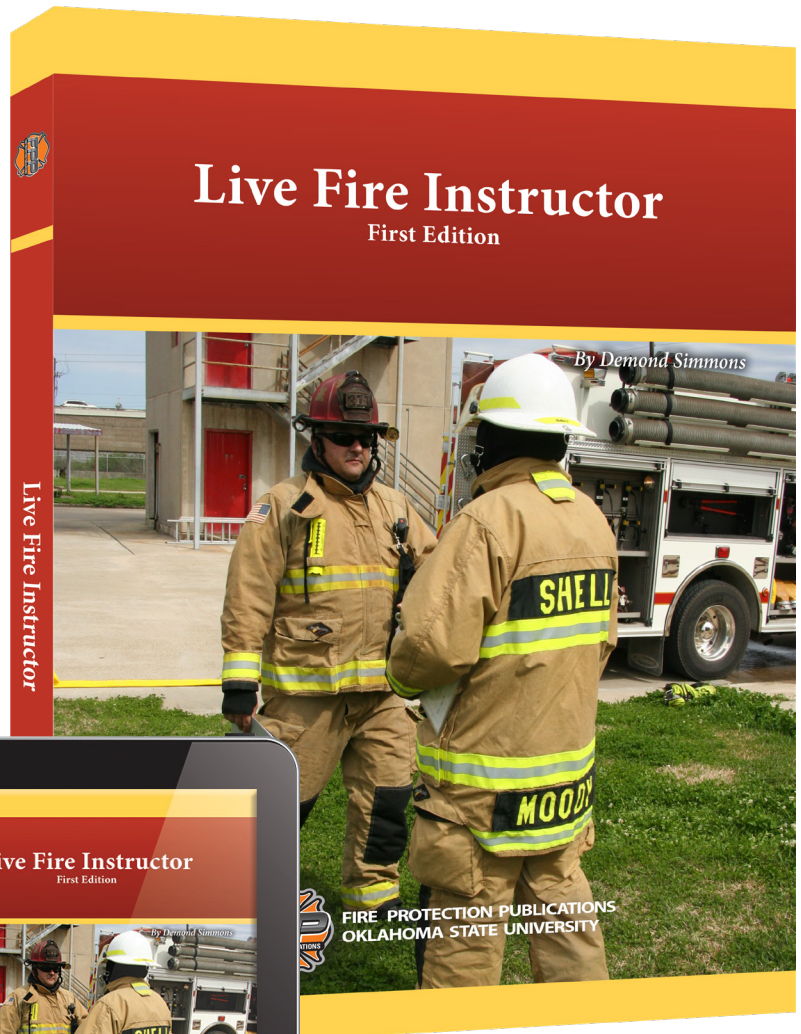

This first edition of Fire Protection Publication's **Live Fire Instructor** is intended to serve as a structured template for instructors tasked with the important responsibility of facilitating live fire training. Like all training evolutions in the profession, live fire training requires instructors strictly follow guidelines and mandates due to the potential of injury or death among participants. This manual has been constructed to meet current recognized guidelines and practices in the field, with a specific focus on leadership, safety and supervision.

To ensure the highest level of safety, all live fire training evolutions must meet the requirements of the appropriate sections of the most current edition of NFPA 1041, *Standard for Fire and Emergency Services Instructor Professional Qualifications*. The **fifteen included Skills Sheets** address the relevant standards in NFPA 1041. Also included is an Appendix of fire behavior training exercises which meet the appropriate section of the most current edition of NFPA 1403, *Standard on Live Fire Training Evolutions*.

Comprehensive and easy to customize curriculum:

- Plan of Instruction and Syllabus templates
- Lesson Outlines and digital presentations
- Tests and answer keys in Exam View
- Skills Evaluation Checklists
- Certification Test Bank
- Instructor Toolbox
- Training Evolutions

FIRE AND EMERGENCY SERVICES COMPANY OFFICER, 6TH EDITION

The sixth edition of **Fire and Emergency Services Company Officer** provides emergency services personnel with skills needed to reach the performance requirements of NFPA® 1021. The text is written for Level I and Level II Fire Officers and fire officer candidates. The goal of this edition is to provide candidates and current company officers with the knowledge needed to develop safe, efficient, and effective leadership skills.

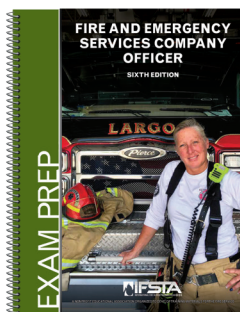

Individuals must also have knowledge in supervision, management, and human relations, as well as administrative duties, community risk reduction, pre-planning, and emergency response duties in relation to fire fighting. These skills, in combination with the material in the text, convey the needed information specific to duties assigned to first-line supervisors and mid-level managers.

The manual has developed an updated format, differentiating it from previous editions. The key term definitions, chapter notes, and review and discussion questions will now appear at the end of every chapter. Finally, Skill Sheets will replace Learning Activities in order to reflect the skill requirements from the standards set by NFPA® 1021. This new format combines all of the necessary review tools in one place for the reader to easily reflect on the key information from each chapter.

CHIEF OFFICER, 4TH EDITION

The fourth edition of **Chief Officer** aims to provide the knowledge and skills base for Fire Officer III and IV candidates that is required by the NFPA® 1021 job performance requirements. The text provides students with information about a chief officer's responsibility to supervise, manage, and administer fire and emergency services organizations.

Chief Officer includes ten chapters that cover material ranging from human resources management to emergency management. Each chapter has been strategically written to provide information that is up-to-date and reflects industry best practices. The layout of the book has been simplified and the information has been organized in a way that makes it as accessible as possible for all students.

Review and discussion questions are provided at the end of each chapter. These questions are designed to help reinforce student understanding and challenge students to think about the information presented in the context of their own organizations. This is the first edition of the IFSTA **Chief Officer** manual to include skill sheets. These skill sheets are intended to prepare the student for the real-world tasks required by chief officers, such as creating an organizational budget and planning for multiagency incident response.

COMPANY OFFICER'S HANDBOOK

Publisher: Fire Protection Publications
 Edition/Publication Date: 1st Edition (2018)
 Pages: 328
 ISBN: 978-0-87939-673-2

Item 36271.....\$77.00 eBook Item 75187.....\$65.45

By Robert P. Murgallis

Once you are promoted to the position of company officer, the knowledge and skills required are not automatically granted to you. This **Company Officer's Handbook** is based on the author's own experiences as a new company officer as well as his extensive experience supervising new company officers. The knowledge he has assembled in this book is what he and others needed to transition into being an effective company officer.

This book expands the knowledge base for entry level officers beyond emergency response. Find leadership, decision making, communications, conflict resolution, personal accountability, critical incident stress debriefing, time management, the responsibility for firefighter safety, as well as incident command, NIMS, fire protection systems, building construction, terrorism, and wildland urban interface fire fighting.

The thirteen chapters are accompanied by a glossary, a list of training references and an index to make finding individual topics quick and easy. The author has prepared this handbook to assist company officers who are beginning their careers with need to know information in one book. He also prepared this book for all company officers who strive every day to be a better officer.

NFPA® 1001

FIREFIGHTER

MARINE FIRE FIGHTING FOR LAND-BASED FIREFIGHTERS, 3RD EDITION

The purpose of this manual is to provide land-based (shoreside) fire service personnel with the training, knowledge, technical information, and reference materials necessary for the safe and effective management of marine fire incidents. The content of this manual is written to meet the job performance requirements (JPRs) of NFPA 1005, the National Fire Protection Association's *Standard for Professional Qualifications for Marine Fire Fighting for Land-Based Fire Fighters*, 2019 Edition.

NEW! Sixteen skill sheets assist the instructor and the student to prepare for skills evaluations. The **Marine for Land-Based Firefighters** also includes a NEW curriculum package per chapter that includes Lesson Outlines, Chapter Tests, and PowerPoints.

FIRE AND EMERGENCY SERVICES ORIENTATION AND TERMINOLOGY, 6TH EDITION

The purpose of this manual is to acquaint new firefighters with the history, traditions, terminology, organization, and operation of the fire and emergency services. In addition, the manual contains typical job and operation descriptions that should provide insight into the inner workings of the fire service. An extensive fire and emergency services glossary is included. The manual is also intended for college students who are beginning their associate's level studies in fire-related fields.

The scope of this manual is to meet the learning outcomes of the National Fire Academy (NFA) Fire and Emergency Services Higher Education (FESHE) Principles of Emergency Services associate's level course. In addition, information in this manual addresses numerous requisite knowledge items identified in Chapter 5, Fire Fighter I, and Chapter 6, Fire Fighter II, of NFPA® 1001, *Standard for Fire Fighter Professional Qualifications*. The manual is intended to be used in a college classroom, but is also an excellent companion text to IFSTA's **Essentials of Fire Fighting**.

FIRE PROTECTION, DETECTION, AND SUPPRESSION SYSTEMS, 5TH EDITION

The purpose of **Fire Protection, Detection, and Suppression Systems, 5th Edition**, is to familiarize fire service members and other interested personnel with the components, design, maintenance, operation, testing, and inspection of common fire protection, detection, and suppression systems. This manual is not intended to substitute for training as a fire inspector or for personnel who design, maintain, and inspect such systems; however, it can serve as a valuable resource for personnel engaged in these activities.

FIRE INSPECTION AND CODE ENFORCEMENT, 8TH EDITION

Make sure that you have the training and certification needed to provide the best risk reduction to your community. Reducing community risk requires trained individuals to verify that a locality adheres to locally adopted fire and life safety standards for structural safety components in construction and renovations. **Fire Inspection and Code Enforcement, 8th Edition**, provides fire and emergency services personnel and civilian inspectors with the basic information necessary to meet the job performance requirements (JPRs) of NFPA® 1031 for Level I and Level II Fire Inspectors. Chapters are delineated with two clearly marked sections: the first section for Level I information followed by a second section for Level II information.

FIRE PREVENTION APPLICATIONS FOR COMPANY OFFICERS, 1ST EDITION

By Brett Lacey and Paul Valentine

Fire Prevention Applications for Company Officers is specifically for company officers who have been, or are newly responsible for, conducting company level inspections. This text blends current and timely philosophical aspects of fire prevention and mitigation with technical inspection details to help a full-time or volunteer officer accomplish basic level inspections in a variety of occupancies. It provides summaries of various occupancy classifications, hazards that are common to these locations, and details on how they should be managed. It provides other basic fire prevention information to help street-level personnel recognize critical fire prevention issues that may be easily corrected or that require the attention of assigned fire prevention personnel. This text is ideal for initial company officer training and ongoing promotional training.

BUILDING CONSTRUCTION RELATED TO THE FIRE SERVICE, 4TH EDITION

The basic fire suppression mission of a firefighter is to enter a burning structure, rescue occupants, and extinguish the fire. The firefighter enters an unknown environment. Effective and safe fire fighting in a structure requires the firefighter to understand building construction, building materials, and the impact of fire on buildings.

The landscape of communities today include buildings made of modern, engineered materials as well as legacy buildings constructed in the early twentieth century or before, and everything in between. All members of the fire service, regardless of their area of responsibility, need an understanding of how structures are built, the nature of the construction materials, and how the buildings are likely to respond under fire conditions.

This edition provides information about building design, construction, construction materials, and how these relate to emergency operations. The information is important for fire prevention and for fire fighting strategy and tactics. Knowledge of building construction is vital when enforcing fire codes, inspecting buildings, developing preincident plans, fighting fire, directing fire ground operations, performing the duties of the incident safety officer, or investigating fires. A thorough understanding of building construction enables fire department personnel to make better and safer decisions to protect people and property.

Although this text is not based on an NFPA® standard, it includes content related to requisite knowledge from NFPA® 1001, 1006, and 1031.

PLANS EXAMINER FOR FIRE AND EMERGENCY SERVICES, 2ND EDITION

By Edward J. Prendergast

This UPDATED manual is for fire department staff and others who review plans for compliance with fire and building codes to ensure public safety. Content in this book is appropriate for any plan examiners in fire prevention divisions, fire marshal bureaus, building departments, and community risk reduction organizations. The 15 chapters in this book present material that meets the job performance requirements (JPRs) of Plan Examiner I and II according to the NFPA 1031, *Professional Qualifications for Fire Inspector and Plan Examiner* (2014). Plan Examiner II requires an in-depth review of sprinkler and fire alarm shop drawings and these are not included in this book.

Four hundred and twenty key terms and definitions are highlighted throughout the book and are included in the glossary. The book features updated photos and illustrations. A sample set of blueprints are referenced in the book and are available to purchase in a package with the text.

This text is used frequently in higher education classes as well as courses to meet the requirements for fire service professional qualifications certification.

OCCUPATIONAL SAFETY, HEALTH, AND WELLNESS, 4TH EDITION

This text meets the Fire and Emergency Services Higher Education (FESHE) learning outcomes and lesson outlines for the associates course, Occupational Safety and Health for Emergency Responders.

Fire and emergency responder safety is a primary responsibility of all emergency services organizations and responders. This manual provides guidance to achieve the requirements of NFPA® 1500, *Standard on Fire Department Occupational Safety and Health Program*. The content is a guide to a comprehensive occupational safety, health, and wellness program in a fire and emergency response organization.

FIRE SAFETY EDUCATION

NFPA® 1035

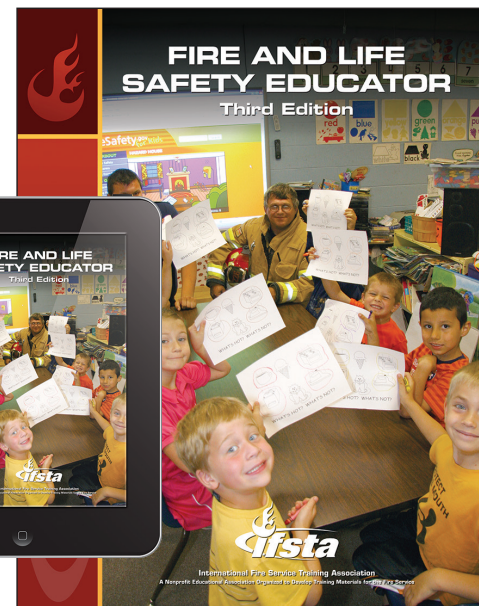

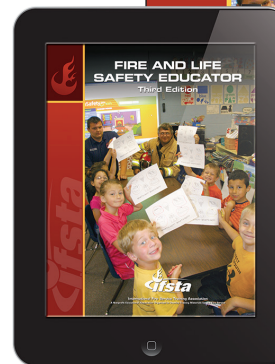

FIRE AND LIFE SAFETY EDUCATOR, 3RD EDITION

Fire and Life Safety Educator, 3rd Edition provides the educator with knowledge to support successful performance as a fire and life safety educator as addressed in NFPA® 1035, *Standard for Professional Qualifications for Fire and Life Safety Educator, Public Information Officer, and Juvenile Firesetter Intervention Specialist*.

New to the **Fire and Life Safety Educator** manual is the addition of two levels: Juvenile Firesetter Intervention Specialist I and Juvenile Firesetter Intervention Specialist II. All levels are covered separately for ease of use. In all, this edition covers five levels of the standard:

- Fire and Life Safety Educator Level I: Chapters 2-6
- Fire and Life Safety Educator Level II: Chapters 7-11
- Fire and Life Safety Educator Level III: Chapters 12-16
- Juvenile Firesetter Intervention Specialist I: Chapters 17-20
- Juvenile Firesetter Intervention Specialist II: Chapters 21-25

This manual should be the first document on a public educator's bookshelf and a "ready reference" of public education knowledge. The manual is intended to *educate* the educator rather than to *train* the educator. In this way, the educator will be able to apply knowledge and skills to many different areas under the "umbrella" of injury prevention and control. The manual focuses on all-risk education. This manual is intended to assist in preparing for certification to the Fire and Life Safety Educator I, II, and III and Juvenile Firesetter Intervention Specialist I and II levels of NFPA® 1035.

RAPID INTERVENTION TEAMS, 2ND EDITION*By Gregory Jakubowski and Michael Morton*

This NEW, second edition presents the purpose of a rapid intervention team (RIT) program and how to implement one in an emergency response organization. The text has updated photos and illustrations and uses the NEW IFSTA one column format that is ideal for adult learners.

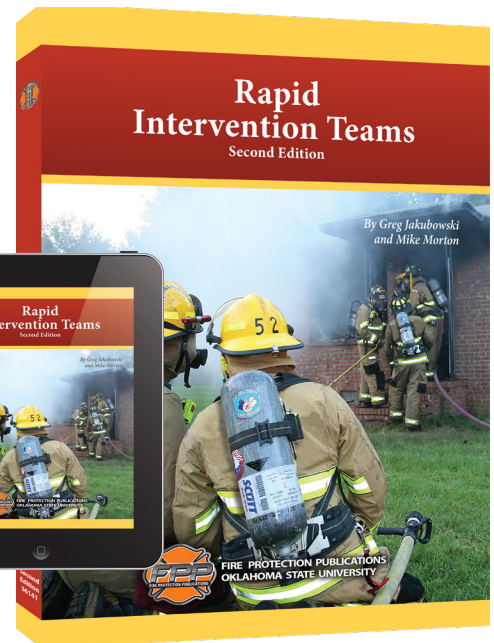

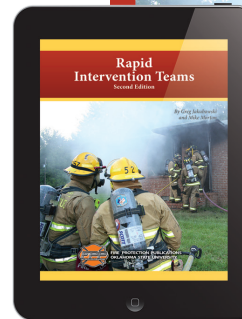

This book serves as a guide to the regulations and standards that apply to RIT including information from NFPA 1407 related to training and operational concepts. It also includes an equipment list for rapid intervention work and how an RIT can use existing equipment.

This manual can be used as a guide for emergency services to develop and implement an up-to-date RIT program and/or modernize a current RIT program. Procedures and practical tips for rescuing those in trouble are included as well as how a two-team concept can provide resources for most rescue situations.

IFSTA's **Fire and Emergency Services Safety Officer, 2nd Edition** meets the job performance requirements of NFPA® 1521, *Standard for Fire Department Safety Officer Qualifications* (2015). The new standard has been updated to include job performance requirements. The 2nd edition provides the reader with everything needed to meet the requirements for both health and safety officers (HSOs) and incident safety officers (ISOs). The manual is divided according to discipline: Chapters 1-12 are for HSOs, Chapters 13-16 for ISOs. Chapters 2-16 include learning activities designed to guide the reader through a practice exercise covering that chapter's content. Each chapter opens with a case history that illustrates a real world example of that chapter's information in application. Finally, most chapters include end notes that guide the reader toward research that was used to develop portions of each chapter.

LEADERSHIP FOR THE WILDLAND FIRE OFFICER, 1ST EDITION

The second edition of Bill Teie's **Leadership for the Wildland Fire Officer - Leading in a Dangerous Profession** has been developed to address various supervisory and leadership positions of wildland firefighting outlined by the National Wildfire Coordinators Group (NWCWG).

This book is aimed toward new and experienced wildland firefighters who serve in a leadership role within their organizations. Chapters 1-5 are an excellent tool for any current or future leader in fire service. Chapters 6-9 deal with the situational and tactical processes a wildland fire officer faces daily. Following Chapter 9 is an addendum containing 15 after-action reports of "Fires We Should Not Forget" as well as the lesson learned from each fire.

FIREFIGHTER'S HANDBOOK ON WILDLAND FIREFIGHTING STRATEGY, TACTICS AND SAFETY, 4TH EDITION

By William C. Teie

The NEW 4th Edition of this bestselling book by noted wildland firefighting author, Bill Teie is updated to address the most current NFPA and National Wildfire Coordinating Group standards and qualifications for wildland firefighting. This book is written for the fire personnel who need a basic understanding of wildland firefighting. Firefighters and fire officers who have primary wildland responsibilities and who may be called into a wildland fire situation as a mutual aid response will all find this handbook valuable. The NEW edition now includes a Fireline Construction chapter. This handbook combines critical components from the 2016 edition of NFPA 1051 and NWCG documents into one source for wildland firefighters, officers, and command staff.

GROUND COVER FIRE FIGHTING FOR STRUCTURAL FIREFIGHTERS, 1ST EDITION

By Thomas E. Richter

This manual is for emergency responders who encounter fast-moving fires that are commonly referred to as ground cover fires or brush fires, as opposed to forest or wildland fires. This book combines information from three trusted sources, the U.S. Forest Service (USFA), the National Wildfire Coordinating Group (NWCG), and the U.S. Department of Agriculture (USDA). The information in this manual presents organized, safe, and effective responses to ground cover fires.

Standards Referenced:

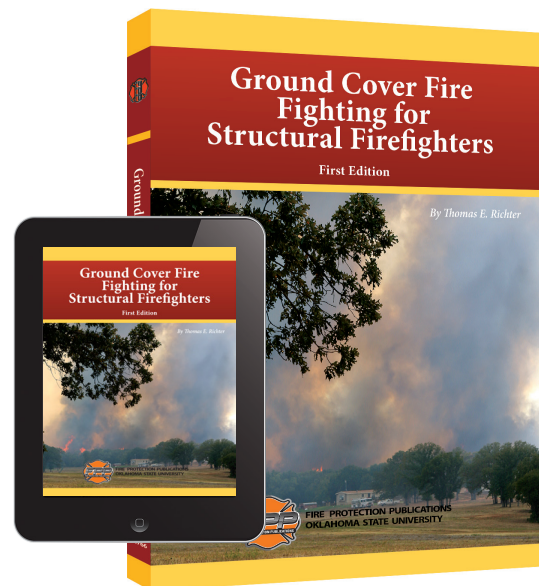

NFPA® 1977, *Standard on Protective Clothing and Equipment for Wildland Fire Fighting* (2016),

NFPA® 1051, *Standard for Wildland Firefighting Professional Qualifications* and

NFPA® 1906, *Standard for Wildland Fire Apparatus*.

About the Author

Tom Richter has served the wildland community as part of the U.S. Forest Service, the Wyoming State Forestry Division, and as a member of the Illinois Department of Natural Resources Interagency Wildland Fire Program. Mr. Richter currently serves the firefighters of Illinois as the Wildland and Prescribed Fire Program Manager at the Illinois Fire Service Institute at the University of Illinois, Champaign-Urbana campus. Tom is also the Deputy Incident Commander for the State of Illinois All Hazards Incident Management Team.

FIRE SERVICE TECHNICAL SEARCH AND RESCUE, 8TH EDITION

Fire Service Technical Search and Rescue, 8th Edition is a primary training text for Level I Rescuers. The manual presents the knowledge and skills for fire service search and technical rescue for Level I Rescuers to safely and effectively conduct Operations-level rescues as defined in NFPA® 1006. The book also supports the corresponding chapters of NFPA® 1670, *Standard on Operations and Training for Technical Search and Rescue Incidents* (2014). According to NFPA® 1670, an Operations Level Rescuer is able to participate in more complex search and rescue incidents under the supervision of a Rescue Technician.

This training manual focuses on Operations-level situations most common for firefighters and rescue squad members. Technician level information has been included to provide Operations-level fire/rescue personnel with the background information needed to effectively support complex technical rescue operations. A firefighter or rescue squad member will find the knowledge and skills in this manual to safely and effectively perform basic search and rescue operations under appropriate supervision.

PRINCIPLES OF VEHICLE EXTRICATION, 4TH EDITION

Principles of Vehicle Extrication, Fourth Edition provides rescue personnel with techniques, skills and equipment available for the safe and effective extrication of victims trapped in vehicles and related machinery.

NEW passenger vehicle technologies are included in this book including Fuel Systems: Electric, Plug-in Electric, Extended Range Electric, Hybrid; CNG, LPG, Biofuel, Ethanol, and Hydrogen. Also Electrical Systems: Keyless Entry and Various Batteries (traditional, lithium Ion, and others). Collision Avoidance Systems and Updated information for other vehicle systems are in this new edition.

The manual includes Awareness, Operations and Technician Level Rescuers for Passenger Vehicle Extrication -- Heavy Vehicle Extrication -- Special Extrication Situations. This text book is appropriate for: Firefighters, law enforcement, emergency medical services (EMS), industrial emergency responders, transportation, public works and utility staff, military responders, and rescue personnel.

INTRODUCTION TO FIRE ORIGIN AND CAUSE, 4TH EDITION

Introduction to Fire Origin and Cause, 4th Edition, addresses key sections of NFPA® 1001 (2013) and NFPA® 1021 (2009) that focus on the first responder's responsibility to begin the process of fire investigation. Validated by IFSTA subject matter experts dedicated to providing an accurate firefighter guide to the process of fire origin and cause determination, the 4th edition has significant updates and new information.

The information in this book helps first responders protect themselves by understanding the hazards present at a fire scene. It explains how fires behave and how that information is relevant to fire investigations. It emphasizes the importance of securing the scene to prevent spoliation, and helps responders to identify the area of origin by analyzing fire patterns and other information. Also included is the process and information necessary to determine the fire cause.

INVESTIGATOR

NFPA® 1033

FIRE INVESTIGATOR, 2ND EDITION

This 2nd edition manual is designed to provide fire investigators with the resources necessary to meet the job performance requirements for fire investigators outlined in NFPA® 1033. Arson investigators, private and public fire investigators, officers responsible for origin and cause determination, and students training to become investigators will find this manual to be an essential resource. This edition places emphasis on area of origin and cause determination with expanded information about fire pattern analysis.

FACILITY FIRE BRIGADES, 2ND EDITION

The manual will assist management and safety professionals in commercial and industrial occupancies with compliance to applicable laws and regulations regarding training and management of fire brigades. The manual is the perfect foundation for any fire brigade training program in any facility. Trainees and instructors will find benefit in using the 144 skill sheets to meet the JPRs specified by the standard.

ALL NFPA® 1081, *Standard for Facility Fire Brigade Member Professional Qualifications*, (2018) JPRs are included. Appendix A is the correlation matrix matching the JPRs with the content in Facility Fire Brigades.

The training manual includes references throughout to:

- NFPA® 600, *Standard on Facility Fire Brigades*, (2015)
- OSHA regulations in Title 29 of the Code of Federal Regulations, Part 1910

NFPA 1081® contains numerous JPRs where training requirements introduced at one level (Incipient) is repeated at other levels (Advanced Exterior and/or Interior Structural). To address this without repeating large volumes of material, Review Sections have been used in some chapters. The information in these Review Sections covers the essential information from the previous chapters but in a condensed format.

The skills sheets for the entire book are together at the back. At the end of each chapter, a list of new skills and skills to review based upon the content of the chapter are included and page referenced to the appropriate skill sheets which are located after Chapter 24.

STRUCTURAL FIRE FIGHTING

STRUCTURAL FIRE FIGHTING: INITIAL RESPONSE STRATEGY AND TACTICS, 2ND EDITION

ALL NEW Strategy and Tactics with 15 Structure Fire Training Scenarios
Be a better decision maker and incident commander at structure fires!

This all new book provides strategy and tactics for the incident commander arriving at structure fire incidents using the available responding resources. Learn to assess the fire situation, initiate a command structure, and deploy resources until the transfer of command or termination of the incident.

The NEW fire dynamics content includes the latest research on fire behavior from UL and NIST with all new photographs and drawings that illustrate these new fire science concepts. Read and see the new science so that you can apply it to structure fires. Strategies and tactics from national experts are presented and applied to hypothetical structure fire scenarios throughout the book.

STRUCTURAL FIRE FIGHTING: HIGH-RISE FIRE FIGHTING, 2ND EDITION

Structural Fire Fighting: High-Rise Fire Fighting, 2nd Edition, is designed to be a companion to IFSTA's other Structural Fire Fighting manuals: Truck Company Skills and Tactics and Initial Response Strategy and Tactics. This manual provides an overview of historic high-rise fires, construction features, fire behavior, water supply, fire protection systems, elevators and escalators, evacuation procedures, preincident planning, incident command, strategy and tactics, and special situations. Topics such as hazardous exposures, wind-driven fires, staging and communications, and working with fire protection systems are given special emphasis.

STRUCTURAL FIRE FIGHTING: TRUCK COMPANY SKILLS AND TACTICS, 2ND EDITION

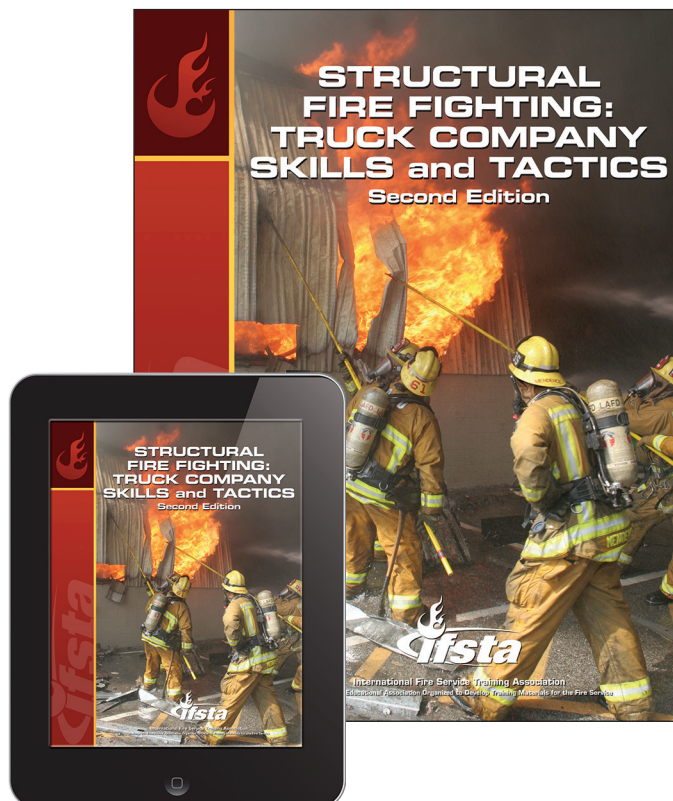

This manual is designed to be a resource for those who engage in "truck work" on the fireground. Building on concepts introduced in Essentials of Fire Fighting, this manual provides more detailed information on such topics as forcible entry, fireground search and rescue, horizontal and vertical ventilation, rapid intervention, loss control, and many other responsibilities traditionally assigned to truck companies.

This manual builds on the information contained in Fireground Support Operations, 1st Edition, and has a special focus on safe fireground operations. Each chapter begins with Safety Points that highlight specific safety reminders for tasks addressed in the chapter. In addition, a scenario at the end of each chapter encourages the reader to apply concepts that have been learned.

COMMAND AND CONTROL: ICS, STRATEGY DEVELOPMENT, AND TACTICAL SELECTIONS, BOOK 1, 2ND EDITION

By Burton Phelps and Robert Murgallis

This book covers incident scene decision-making in depth; provides techniques to enhance a firefighter's ability to make rapid, correct decisions based on knowledge of various types of occupancies; and addresses the development of strategy and tactics and the size-up process. This book presents the Incident Command System (ICS) from the perspective of day-to-day application. While branch operations, complex command, and area command are discussed, the ICS presented principally addresses those functions needed to handle the majority of incidents to which firefighters respond. Specific information common to types, or groups, of occupancies is presented with examples, and reader activities are included in each chapter. Occupancy-specific cues, cue-based decision-making, incident management cues, and strategy and tactics are provided for each occupancy type covered.

COMMAND AND CONTROL: ICS, STRATEGY DEVELOPMENT, AND TACTICAL SELECTIONS, BOOK 2, 2ND EDITION

By Robert Murgallis

This book details the basic processes that apply to all incidents as well as some of the specific procedures necessary to make effective decisions at certain common occupancies. The authors explain basic ICS elements using an easy-to-understand method and introduce the concepts of Unified Command, Complex Command, Area Command, and Incident Management Teams.

AIRCRAFT RESCUE AND FIRE FIGHTING, 6TH EDITION

Airport Firefighters, Driver/Operators, and Crew Chiefs will use this text to meet the most current NFPA, FARs, and ICAO requirements.

The book includes:

- 31 Skill Sheets NEW in this edition
- Photos, Illustrations and Learning Activities – ALL NEW
- Review Questions for all 12 chapters

This book provides the information firefighters need to effectively perform the tasks for aircraft rescue and fire fighting and to complete airport firefighter certification. Content includes:

- Familiarization with civilian and military aircraft
- Airport familiarization
- Operating structural and specialized aircraft fire fighting apparatus and equipment
- Safety and aircraft hazards
- Airport fire and rescue communications
- Rescue tools and equipment including gaining access to aircraft interiors
- Aircraft fuels, aircraft components, and extinguishing agents
- Aircraft fire suppression strategy and tactics including engines, auxiliary power units, wheel assemblies, and rocket engines
- ARFF vehicle driver/operator
- Airport emergency planning
- The theory and practice of aircraft fire fighting and rescue ops

This manual is intended to meet the requirements of:

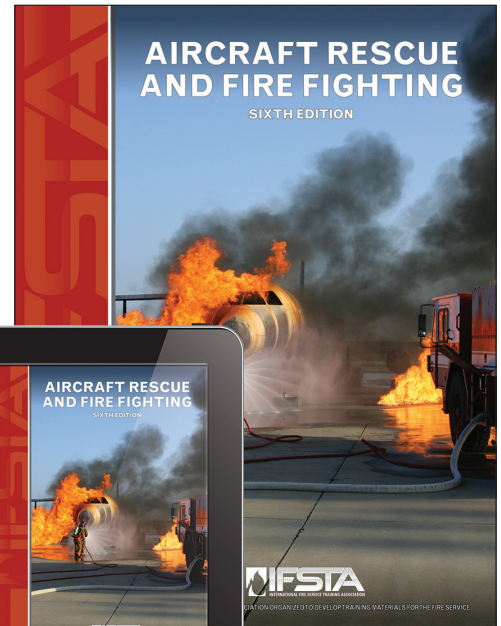

NFPA 1003: *Standard for Airport Fire Fighter Professional Qualifications* (2015)

NFPA 1002: *Standard on Fire Apparatus Driver/Operator Professional Qualifications* (2014) Chapter 9

NFPA 402: *Guide for Aircraft Rescue and Fire-Fighting Operations* (2013)

NFPA 403: *Standard for Aircraft Rescue and Fire-Fighting Services at Airports* (2014) is referenced throughout the book.

Federal Aviation Regulations (FARs) 139.315, 139.317, and the International Civil Aviation Organization (ICAO) Airport Services Manual, Parts 1 and 7 training requirements are included.

INCIDENT COMMAND SYSTEM MODEL PROCEDURES GUIDE FOR INCIDENTS INVOLVING STRUCTURAL FIRE FIGHTING, HIGH-RISE, MULTI-CASUALTY, HIGHWAY, AND MANAGING LARGE-SCALE INCIDENTS USING NIMS-ICS (BOOK 1), 1ST EDITION

Prepared by the National Incident Management System Consortium
Model Procedures Committee

This manual includes basic information on NIMS-ICS and detailed information on how to apply it to structure fires, high-rise fires, major EMS incidents, roadway incidents, and large-scale incidents of all types. It includes concepts such as unified command, area command, joint operations centers (JOC), multi-agency coordination centers (MACC) and much more.

FIRE SERVICE HYDRAULICS AND WATER SUPPLY, 3RD EDITION

By Michael Wieder

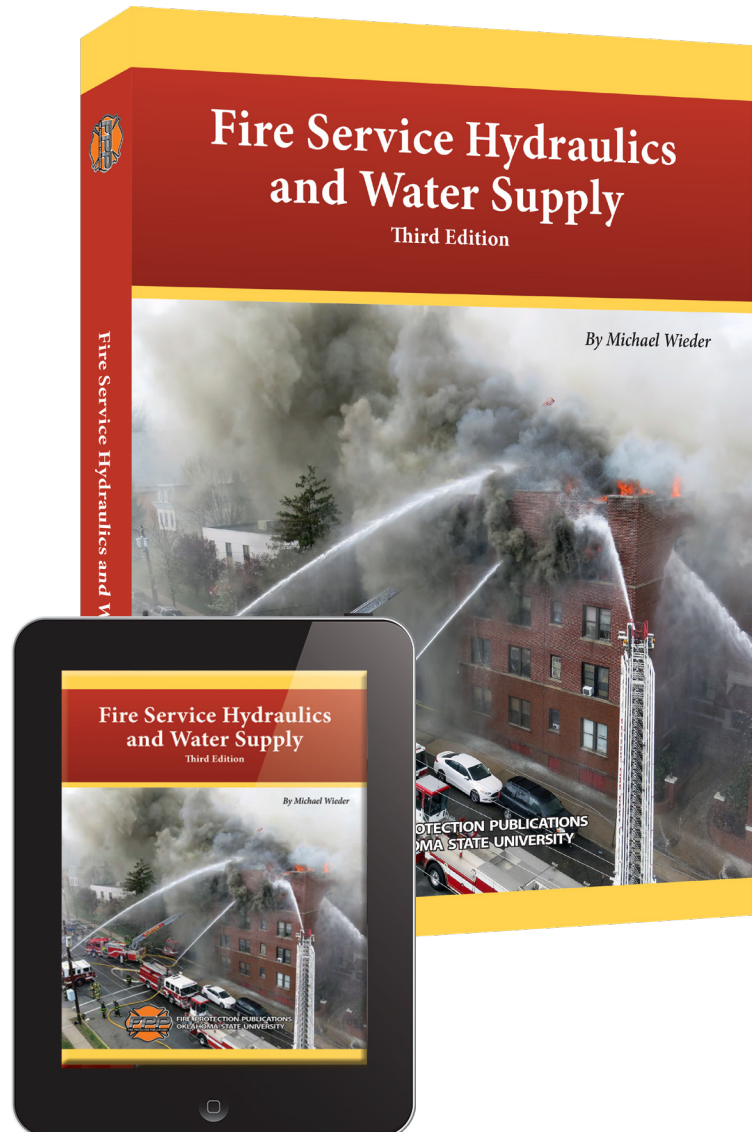

The ability to identify a sufficient water supply source and use it effectively to control a fire is one of the most basic functions of the fire service. This manual includes information on the basics of water and water flow, theoretical and practical methods of determining water flow and pressure loss, types of pumps and fire apparatus used to move water, relay pumping operations, and effectively supplying sprinkler and standpipe systems.

In addition to new, up-to-date photos and graphics, this 3rd edition discusses recent research on updating friction loss coefficients for modern fire hose. This is also the first edition of this text that includes information and calculations using the metric system of measurement.

This manual was written to meet all of the National Fire Academy's FESHE model course curriculum objectives for Fire Protection Hydraulics and Water Supply (C0277) course at the Associate's Degree level. Some requirements from NFPA® 1002, *Fire Apparatus Driver/Operator Professional Qualifications* (2017 edition) are addressed throughout various portions of the text.

About the Author

Mike Wieder has written books about water supply for the fire service for more than 30 years. He is the writer of the first IFSTA Pumper Apparatus Operator manual published in 1989. He was awarded the ISFSI George D. Post Instructor of the Year Award in 2003 recognizing extraordinary accomplishments in fire service training. Mike also received the International Fire Service Training Association (IFSTA) 2008 Everett Hudiburg Award recognizing his significant contributions to firefighter training. Mike serves as the Associate Director of Fire Protection Publications at Oklahoma State University and Executive Director of IFSTA. Mike has degrees in fire protection and safety engineering technology and in occupational and adult education, both at OSU. Mike began his fire service career in his native Pennsburg, Pennsylvania and also served three years with the Stillwater (OK) Fire Department.

FEATURED FPP PRODUCTS

THE SOURCEBOOK FOR FIRE COMPANY TRAINING EVOLUTIONS, 3RD EDITION

By Michael Wieder

Thousands of fire instructors and officers have used this reference to deliver easy, meaningful two- to three-hour training programs within their fire departments. Busy fire instructors and training officers who struggle to arrange and prepare weekly or monthly training drills will appreciate this text as it has 75 training sessions completely prepared and ready for implementation. Training sessions include basic firefighter skills, driver/operator skills, activities for inclement weather, company evolutions, and competitive, yet useful, exercises.

ResourceOne

An Online Fire Service Training Solution Based on IFSTA Publications and Curriculum

ResourceOne is a one-stop learning management system (LMS).

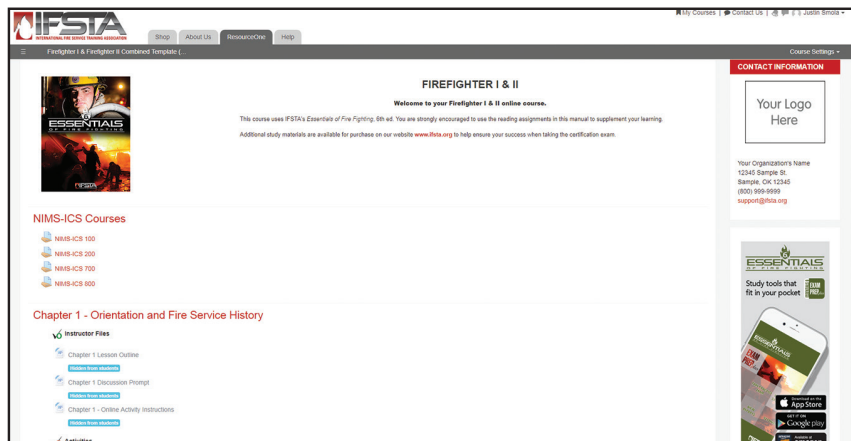

- ✓ Affordable
- ✓ Easy to use
- ✓ No contracts
- ✓ Customization/technical support
- ✓ No set up fees or development costs
- ✓ All of your department's training hosted and managed in one central location
- ✓ Train-the-trainer sessions to assist with implementation in your department
- ✓ Downloadable instructor materials for verified fire service instructors

ResourceOne can help instructors meet the training needs of their department for in-classroom, blended, and online training.

INSTRUCTORS can use ResourceOne to:

- Deliver the content of a course in a “virtual classroom” environment
- Blend face-to-face training and online instruction
- Focus in-person classroom time on skills-based training rather than cognitive content
- Auto-grade tests and quizzes
- Provide course materials (syllabus, quizzes, homework, skill sheets, SOPs, etc.) to students online
- Provide customized content for students to personalize training courses and meet local requirements
- Host department-specific content such as videos, SOP/SOGs, student handbooks

r1.IFSTA.org

MAKE A DIFFERENCE!

Would you like to have a greater influence on
firefighter training?

Join an IFSTA Validation Committee!

Apply to be an IFSTA delegate and serve as a subject matter expert on one of our validation committees. Every IFSTA manual is vetted and validated through a committee of selected experts to ensure that the information we publish is safe, accurate and current. Help us create the best fire training materials possible by applying at www.ifsta.org/about-us/ifsta-validation-committees.

Tentatively, we plan to form the following committees in 2021:

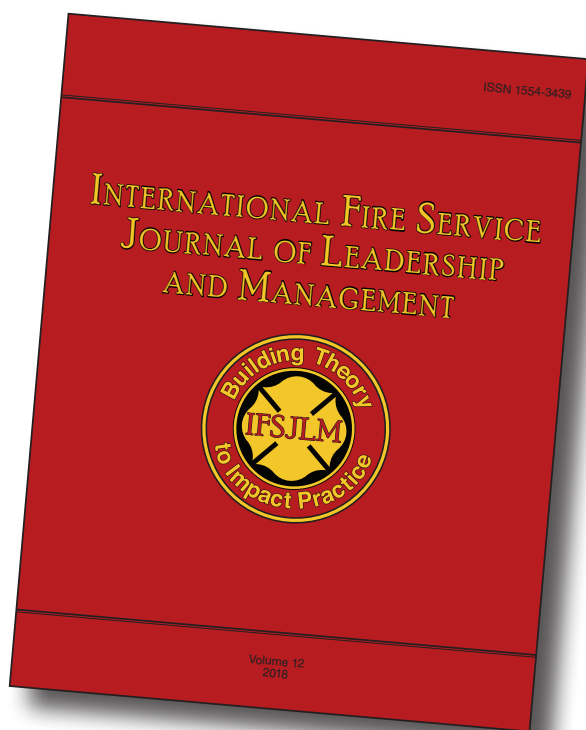

- Aircraft Rescue and Fire Fighting, 7th Edition; applications open 04-01-2021 to 06-15-2021
- Fire and Emergency Services Company Officer, 7th Edition; applications open 04-01-2021 to 06-15-2021
- Chief Officer, 5th Edition; applications open 10-01-2021 to 12-15-2021

Written for Firefighters by Firefighters.

SHIPPING & RETURNS

FREE SHIPPING

IFSTA provides free ground shipping for the 48 contiguous U.S. states. This excludes Alaska and Hawaii.

FREE SHIPPING does NOT include bookstores and IFSTA Distributors, APO, AEO, FPO, and DPO.

General Shipping Information

We require an actual physical address (instead of a post office box) to guarantee delivery.

Same day processing can be guaranteed for orders that are submitted by 12:00 pm CDT/CST.

Shipping days are Monday through Friday and do not include Saturday and Sunday or holidays. Delayed deliveries due to inclement weather are beyond our control.

ALASKA and HAWAII

Free Shipping is NOT available for Alaska and Hawaii.

APO/FPO Addresses

APO and FPO addresses will be shipped through the U.S. Postal Service as Certified Priority Mail.

International Customers

Prepayment is required including shipping costs for the products ordered. Payment methods include check, credit card, money order, or draft against a U.S. bank. A \$25.00 bank processing fee will be added for electronic funds transfer (EFT).

To place an order or to receive a quote for delivery charges outside the United States (including U.S. Territories), call 800.654.4055, or fax 405.744.8204.

**Return Policy
Customers**

- Items must be returned within 30 days of invoice date
- Items must be in resalable condition with shrink wrap in place
- Include a copy of the invoice
- Include an explanation for the return
- Items must be shipped via UPS or FedEx at customer expense
- Old editions cannot be returned

Bookstores

- Item must be in resalable condition with shrink wrap in place
- A 15% restock fee will be applied to the return
- Include a copy of the invoice
- Include an explanation for the return
- Items must be shipped via UPS or FedEx at customer expense
- Old editions cannot be returned after 6 months of new edition release date

Please call **800.654.4055**, or email Customer Service at customer.service@osufpp.org if you have questions.
